### The mobile stainless steel prewash trolley

- Material: Trolley and tub made entirely of stainless steel
- **Ready-to-connect system:** only connected to the water pipe. Including ST-45 inlet coupling (hose nozzle with plug nipple for 1/2" DN 13 or 3/4" DN 19) and drain valve on the underside (with hose barb for DN 13)
- The water and detergent supply is automatically closed or opened by a float valve
- The detergent can be dosed using various dosing nozzles supplied
- Two separate areas for different brushes: (Hand wash brushes - long handle brushes)
- High quality tires made from abrasion-resistant material
- Space for detergent canisters up to - 30 liters

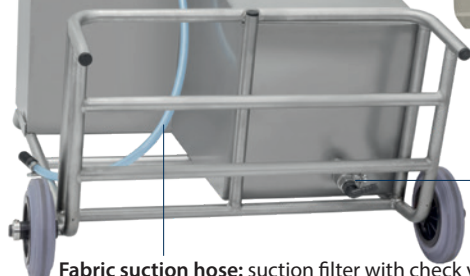

**Simple and agile:** easy to maneuver, even when filled, like a hand truck.

**Dirt protection:** The brush is clean on a removable pad.

ST-45 low pressure quick coupling with plug nipple: connection possibility for water hoses 1/2" + 3/4".

suction hose included

Fabric suction hose: suction filter with check valve.

Ball valve on the underside: drainage option also for possible soiling that settles on the tank bottom.

R+M Nr. 105 830	ST-45	ball valve
